

Microbridge's family of Rejustors now available in a QFN package!

Responding to the needs of our lead customers, Microbridge invites you see our latest offering of low TCR resistance trimmable Rejustors in QFN packages: [Click here](#)

Microbridge's Rejustor enables product designers to achieve one-step calibration and passive adjustment, is adaptive and adjustable in circuit, and it allows calibration in the analog domain to improve the design of current and future products.

Rejustors are finding their way into precision analog applications, sensors, automotive and consumer products and are helping to reduce manufacturing costs, improve yields and product performance. To see what they can do for you, visit our new website www.rejustor.com and learn more about all of Microbridge's latest products.

Dual Rejustors are available in SOIC-8 or smaller footprint QFN-16 (3mm x 3mm quad) standard packages which are Pb-free, green and RoHS compliant. Samples are available immediately with volume production lead times of 6 to 8 weeks.
